Re: Phase IV – Final Work Plan
PPL Martins Creek
Lower Mount Bethel Township
Northampton County

Dear Mr. Shamory:

We are in receipt of your November 8, 2006 letter and the accompanying Phase IV Work Plan. The Plan is intended to assess any long-term impacts resulting from the August 2005 flyash discharge from Basin #4 at the PPL Martins Creek facility. As you know, various elements of the work plan were previously approved verbally by the Department upon discussion with the NRDA Team. The Department hereby acknowledges your submission of the FINAL Phase IV Work Plan, which includes two addendums, one for completing a mussel study and one for completing a pool benthic study. We look forward to receiving the results of PPL's Phase IV investigation.

If you have any questions regarding this letter, please contact me at the above-referenced phone number.

Sincerely,

Kate Crowley
Water Program Manager
Water Management Program
